

# Job Posting: Manufacturers Representative – Feed Additives

Location: Home Office (near Winnipeg preferred)

Our client manufactures and distributes a wide variety of species-specific animal feed additives. They are a world leader in this sector with exports to over 50 countries. These additives enhance nutrition levels for livestock, and economic returns for producers. We are looking for a TERRITORY MANAGER with good technical feed nutrition knowledge and great communication skills to describe the benefits of these products to customers.

As the Territory Manager you will promote your product line to feed companies and premix manufacturers in Manitoba and Saskatchewan. This is a well established territory with high brand awareness. You will call on nutritionists, purchasers, production managers, mill managers, business owners, and field sales reps. With this product line, it's good science and good relationships that lead to a sale. Therefore you must have a feed industry background and good communication skills so you can explain the technical data and the benefits of these additives. In addition to that, you must be a relationship builder that is strong on follow up. If this describes you, send us a resume that outlines your education, your sales experience and your feed industry track record.

Steve Peddie is heading up this talent search, so please call him for more details regarding this agriculture job. Toll free direct and confidential 888 254 3555. If you are interested in this agriculture job, don't wait. We will fill the position when a suitable candidate is found, (and that may be before this posting expires). We will accept applications until this agriculture job is filled. All applications are kept strictly confidential.
