

# Graduate Student Position (MSc.)

## ----- Revegetation of Disturbed Lands

**A graduate student position (M.Sc. level) is available in the department of Biological Sciences at the University of Manitoba (Canada)**

The project focuses on revegetation of disturbed areas in Northern Manitoba. The goal of this research is to identify suitable plant species based on their ecological and physiological requirements and provide guidelines on the strategies to use for revegetation.

UNIVERSITY  
OF MANITOBA

Interested students should contact as soon as possible:  
Dr. Sylvie Renault at [Sylvie.Renault@umanitoba.ca](mailto:Sylvie.Renault@umanitoba.ca) or  
Dr. John Markham at [John.Markham@umanitoba.ca](mailto:John.Markham@umanitoba.ca)

The ideal candidate will have a background in plant biology or related fields, a valid driving license, training in field research, be able to work independently and communicate well with others.
