

68:302 INDIGENOUS RESEARCH, METHODOLOGIES, AND THE PROCESS

(3)

Prerequisite: 68:151.

This course is designed to teach students how to do qualitative research, while incorporating Indigenous methods to conduct research with Indigenous Peoples and their communities. Students will learn how to design a study, including: selecting a topic; what types of data to collect; the importance of ethics (western & Indigenous); analyzing data; writing the research paper; communicating the results with the community; and ownership of information. Guest speakers will attend class to discuss their experiences as Indigenous researchers and the challenges and rewards they encountered doing research with Indigenous Peoples.

3 lecture hours per week, one term.
