

Habitat Conservation Technician

Term: 1 year
Salary: \$39,900
Location: Brandon, MB
Start Date: May 1, 2019

Background:

The Manitoba Habitat Heritage Corporation (MHHC) was formed in 1986, focussing on private-land conservation programming in Manitoba. Since that time, MHHC has permanently protected more than 200,000 acres of habitat in southern Manitoba. Its programs focus on the protection of habitat for the benefit of all wildlife species, with emphasis on species at risk and waterfowl.

Position Description:

For this one-year contract, MHHC is seeking a motivated and dynamic individual that can work independently in the field, as well as, interacts well with the public and co-workers. The position offers a variety of opportunities as it relates to conservation programming in Manitoba.

The Habitat Conservation Technician position is a full-time, 1-year term contract. In this position, the employee will support the MHHC Conservation Program Delivery with project surveying and administrative reporting duties, related to Conservation Agreement Baselines and Monitoring, Range Health Assessments, Wetland functional Assessments, GIS and GPS Mapping and Project Tracking, MHHC Land Management Project Tracking and File Maintenance.

Essential Qualifications:

- Post Secondary degree or diploma in Botany, Ecology, Environmental Science, or Land and Water Management or Equivalent.
- This position requires that the successful candidate have significant computer skills with knowledge of:
 - Microsoft Word, Excel, Access and PowerPoint
 - ARC GIS, GPS
 - Adobe
- Valid Class 5 drivers license
- Written and oral fluency in English

Asset Qualifications:

- Knowledge or experience in farming and rural Manitoba
- Access to reliable personal vehicle for work purposes
- Experience or education in photography
