

Technologist, Regulatory Division – Ag Water Management

Competition Number and Available Locations:

WSA-59/65-2020/21 – North Battleford – 2 positions

WSA-61-2020/21 – Weyburn – 1 position

WSA-60/64-2020/21 – Nipawin – 2 positions

WSA-62/63-2020/21 – Yorkton – 2 positions

Technologists in our Regulatory Division provide front-line service to a wide range of stakeholders, including farmers, ranchers, local governments, water agencies and organizations, and Qualified Persons and firms involved in water management. You will be a contributing team member within the new Agricultural Water Management Branch – with a focus on advancing network (watershed-based) agricultural drainage approvals and/or resolving complex drainage complaints – providing value to the province's agriculture industry, rural communities, and Saskatchewan's natural resource base. Experience in the agricultural sector is a key asset.

You will apply your knowledge and gain experience in client service, stakeholder communications, ground and aerial survey techniques, field observation skills, air photo interpretation, provincial legislation, regulations, policy, and related principles, and applicable legal documentation procedures. In this role, you will proactively engage with Saskatchewan citizens, respond effectively to potentially difficult situations, and build your capacity to independently handle complex issues to assist in achieving WSA priorities and objectives.

The successful candidate should possess a diploma in Water Resources Engineering Technology or a similar technical discipline, and will have, or will immediately obtain and maintain registration with Technology Professionals Saskatchewan (formerly SASTT) as an Applied Science Technologist (A.Sc.T.) or another relevant Professional Association. Equivalent combinations of education and experience will be considered.

Water Security Agency

Water Security Agency (WSA) is responsible for government's core water management responsibilities. We manage the province's water supply, regulate drainage, own and operate 72 dams and related canals, write water policy and law, build needed scientific knowledge, assess water quality and ecological health, develop and deliver water programs, interjurisdictional water agreements, protect water quality, ensure safe drinking water and treatment of wastewater, reduce flood and drought damage, protect aquatic habitat and provide information about water.

We offer rewarding career opportunities, competitive salaries and a comprehensive benefits package. To learn more about the work we do and for a full scope of duties for this position, visit wsask.ca.

To Apply:

Please submit a cover letter, quoting the relevant competition number(s) you are interested in based on location, and detailed resume, by **5:00 pm October 25/20** to:

Human Resources
