Discovering Statistics Using IBM Statistics (4th ed) BY ANDY FIELD

This book is one of the resources available in our **Research Unit library**. The author endeared me to the book by adding the sub title “and sex,

Field has managed to demystify statistics with his accessible and engaging text. A lifeline throughout my PhD.

Dr. Penny Tryphonopoulos

drugs, and rock and roll” on the inner cover. He also had fans of the book send in pictures of their cats with the book and called them satisfied customers, such as Sarah Dahl’s cat (see picture insert).

The author tends to use his humour throughout, making this not your average statistics text!

The book is set up to appeal to undergraduates, graduate, and doctoral level readers. So, if you need to dust off your statistics skills using SPSS, this might be your ‘go to’ book.

And speaking of SPSS....watch for an upcoming opportunity to learn, refresh and practice using SPSS. Coming to 4 evenings in October... More information to follow
