Select the Appropriate Type of Occurrence			
A) Medication			
Name of Medication Involved:	Dose:	Route:	Frequency:
B) 🗗 Other (including falls)			
Descriptive Report			
Why do you think this happened? Identify specific factors that contributed to the incident. For medication errors, include a focus on performance of the medication rights and processes. What was the possible outcome(s) of your actions on client/family, team and yourself? What could be done to prevent this event from happening again? Consider student's practice, changes in facility and other.
