

Manitoba's Rural Demography

Structure and Trends

An Update

Webinar prepared for the
Rural Development Institute
Brandon University
November 4, 2014

Ray D. Bollman

Adjunct Professor, University of Saskatchewan

Manitoba's Rural Demography

Outline

- Rural development is getting harder - - - because there are now fewer potential labour market entrants than potential retirees
- Non-metro has had 40% of Manitoba's population since 1996
- Non-metro Manitoba is growing.
- The sources of population change are:
 - Natural balance = births minus deaths
 - Internal migration (voting with your feet regarding where to live)
 - Immigration – some communities are attracting immigrants
- Youth migration: How many leave? How many return?
- 17% of Manitoba's population reports an Aboriginal Identity
- From a short-distance society to an industrial society to an open society.

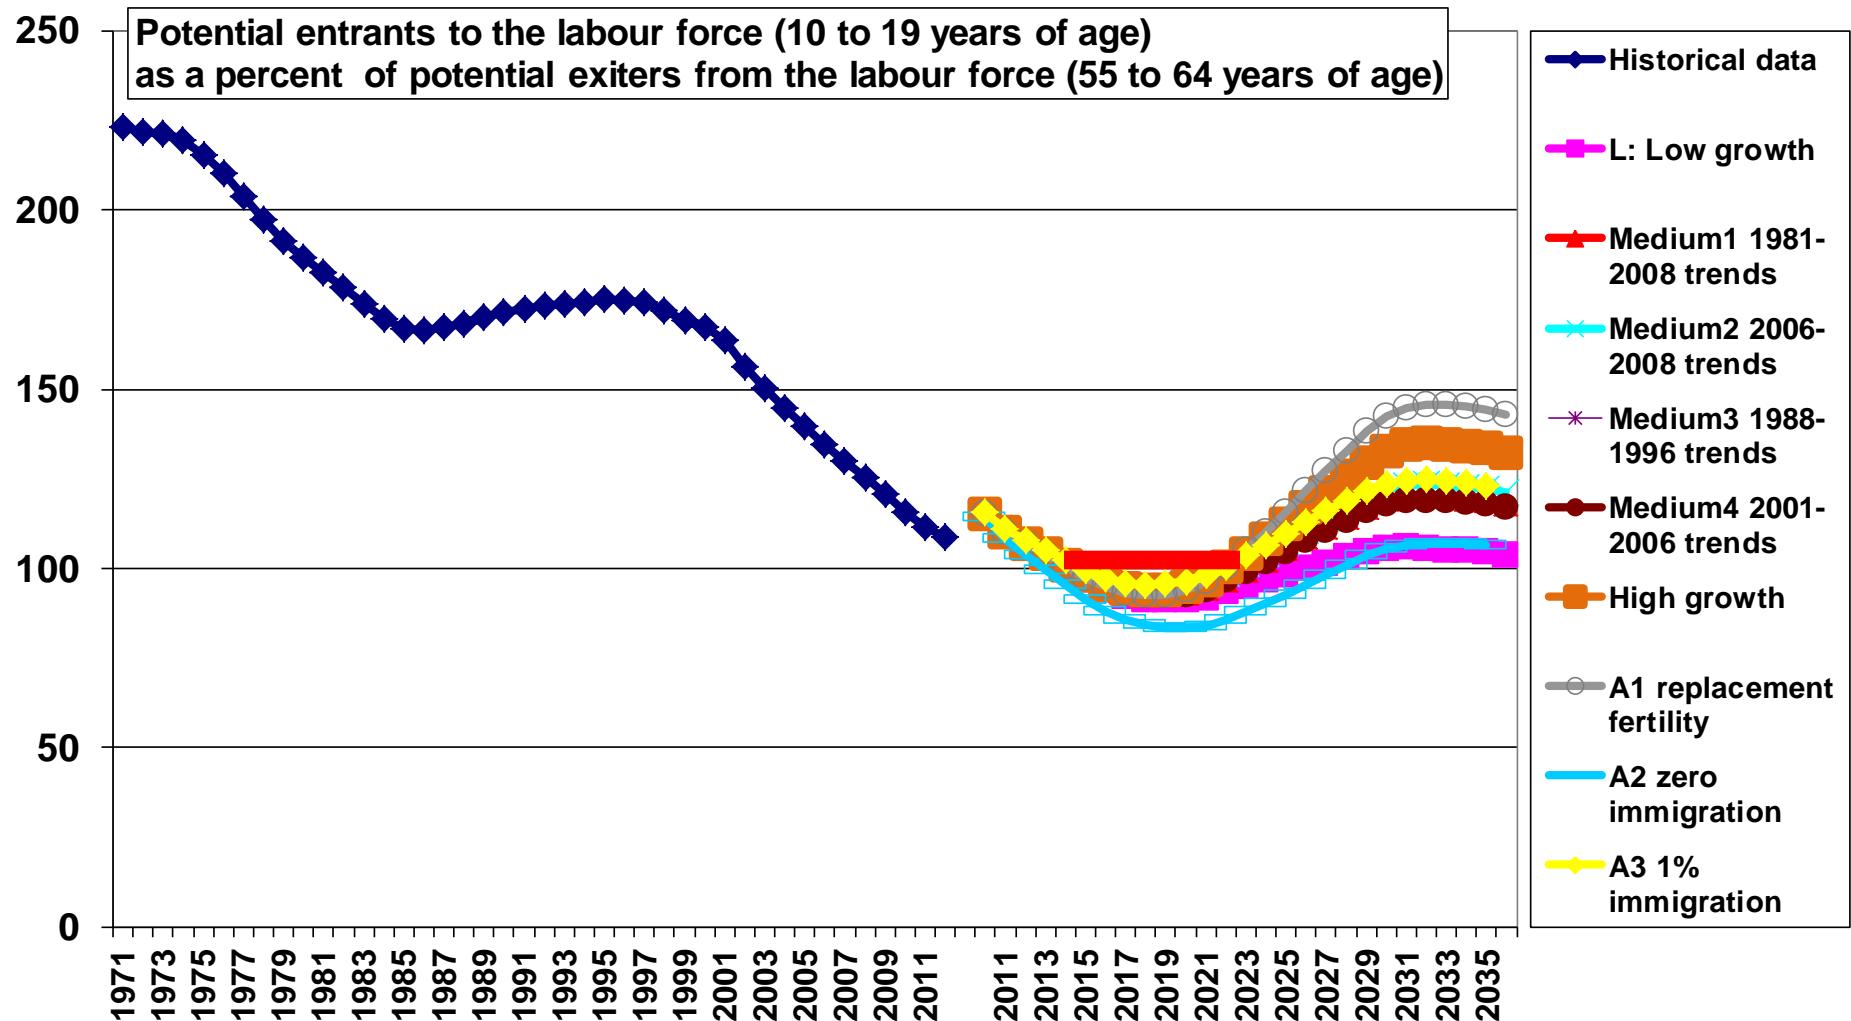

On the topic of youth outmigration, the flyer mentioned I grew up in Moline. Here is the Moline School, sometime in the 1950s. I spent 8 years in the south room and by the time I was eligible to graduate to the north room, the school bus came and took me to town for high school.

Manitoba's Rural Demography

Outline

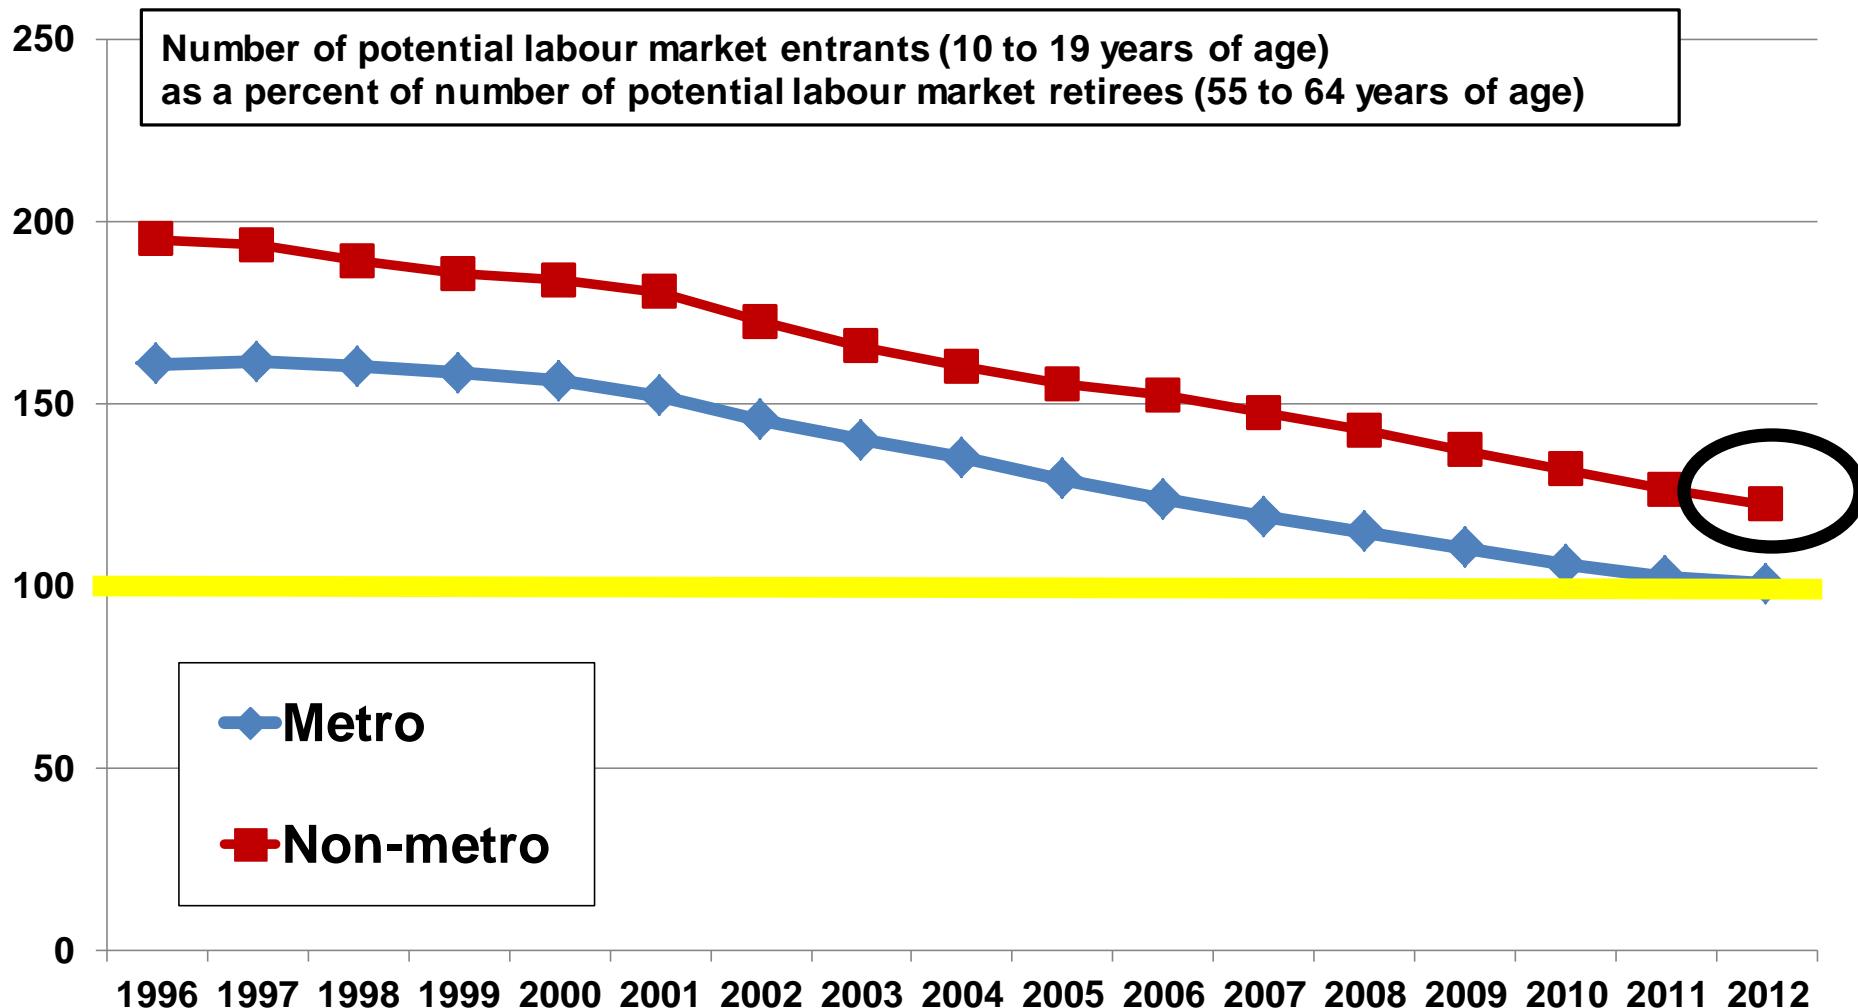

- **Rural development is getting harder - - - because there are now fewer potential labour market entrants than potential retirees**

Potential labour market shortage from 2013/15 to 2021/27 due to less than 100 labour market entrants per 100 labour market retirees, Manitoba

Source: Statistics Canada, Demographic Estimates and Projections, CANSIM Tables 051-0001 and 052-0005.

Demographic replacement of working age population is still above 100%, non-metro Manitoba

* Reclassification is not an issue in this time series. These data have been tabulated within the 2006 boundaries of metro and non-metro.
Source: Statistics Canada. **Annual Demographic Statistics**. CANSIM Table 051-0001 and 051-0046.

**Number of potential labour market entrants
(10 to 19 years of age) as a percent of
number of potential labour market retirees
(55 to 64 years of age)**

	Metro	Non-metro
Newfoundland and Labrador	79	63
Prince Edward Island	n.a.	88
Nova Scotia	80	72
New Brunswick	83	70
Quebec	85	70
Ontario	101	81
Manitoba	100	122

Manitoba's Rural Demography

Outline

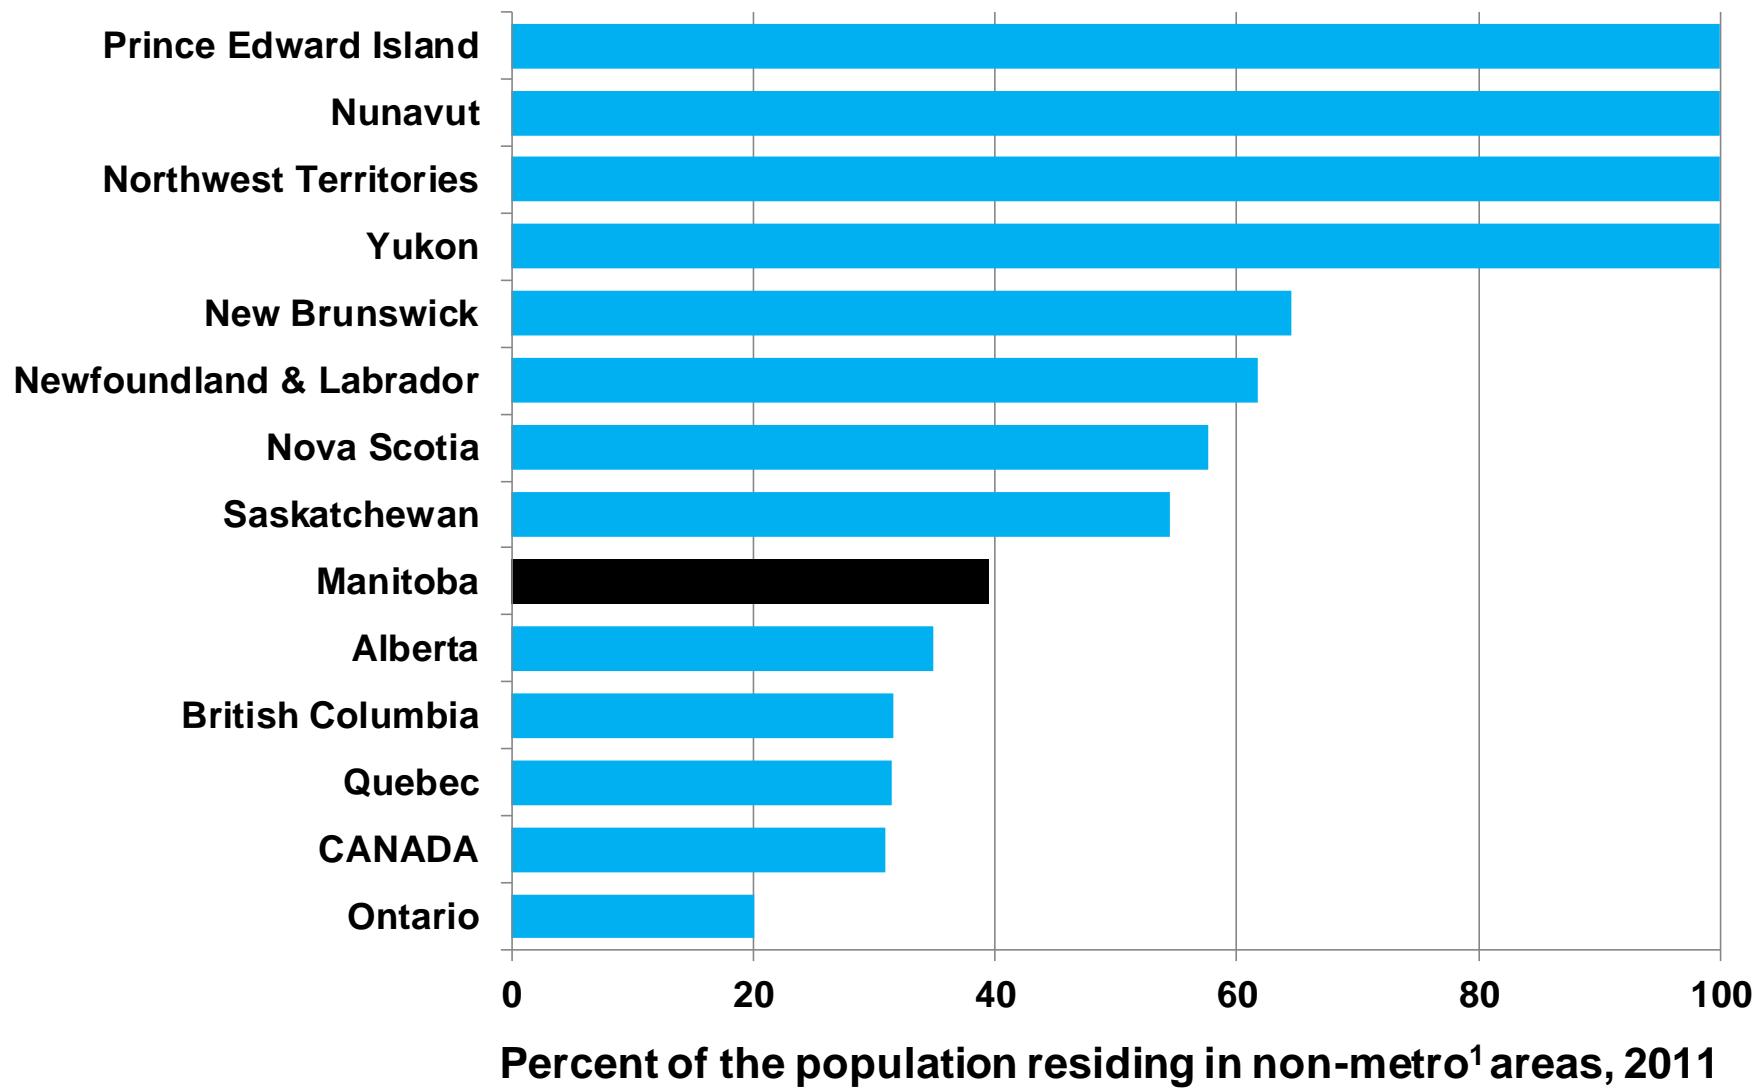

- Rural development is getting harder - - - because there are now fewer potential labour market entrants than potential retirees
- Non-metro has had 40% of Manitoba's population since 1996

Non-metro represented 40% of Manitoba's population in 2012

* Reclassification is not an issue in this time series. These data have been tabulated within the 2006 boundaries of metro and non-metro.
Source: Statistics Canada. **Annual Demographic Statistics**. CANSIM Table 051-0001 and 051-0046.

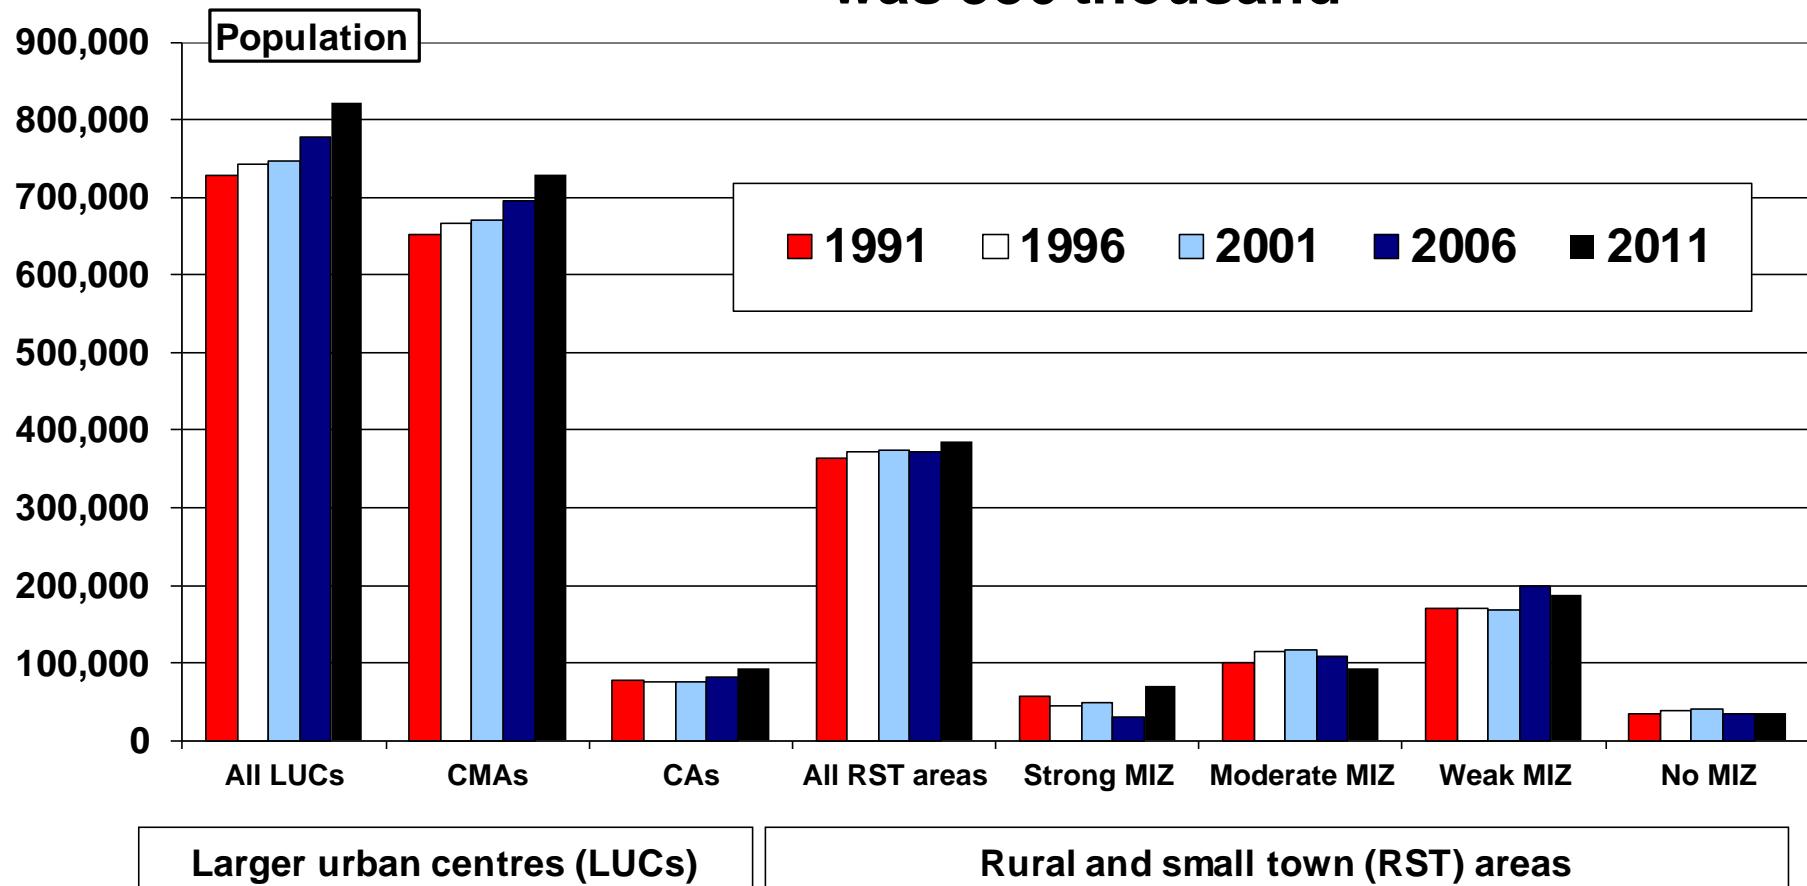

In 2011, 40% of Manitoba's population resided in non-metropolitan areas

1. Non-metro refers to the population outside Census Metropolitan Areas (i.e. areas with a core population of 50,000 or more and a total population of 100,000 or more, including all neighbouring towns and municipalities where 50% or more of the employed residents commute to the CMA).

Source: Statistics Canada. Census of Population, 2011.

In 2011, Manitoba's rural and small town population was 386 thousand

Note: Data are tabulated within boundaries applicable at the time of the given census.

In 2006 and 2011, Census Metropolitan Areas (CMAs) have a population of 100,000 or more (with 50,000 or more in the built-up core) and includes all neighbouring towns and municipalities where 50% or more of the workforce commutes to the built-up core. Census Agglomerations (CAs) have 10,000 or more in the built-up core and includes all neighbouring towns and municipalities where 50% or more of the workforce commutes to the built-up core. Metropolitan Influenced Zones (MIZ) are assigned on the basis of the share of the workforce that commutes to any CMA or CA (Strong metropolitan influenced zone: 30% or more; Moderate metropolitan influenced zone: 5 to 29%; Weak metropolitan influenced zone: 1 to 5%; No metropolitan influenced zone: no commuters).

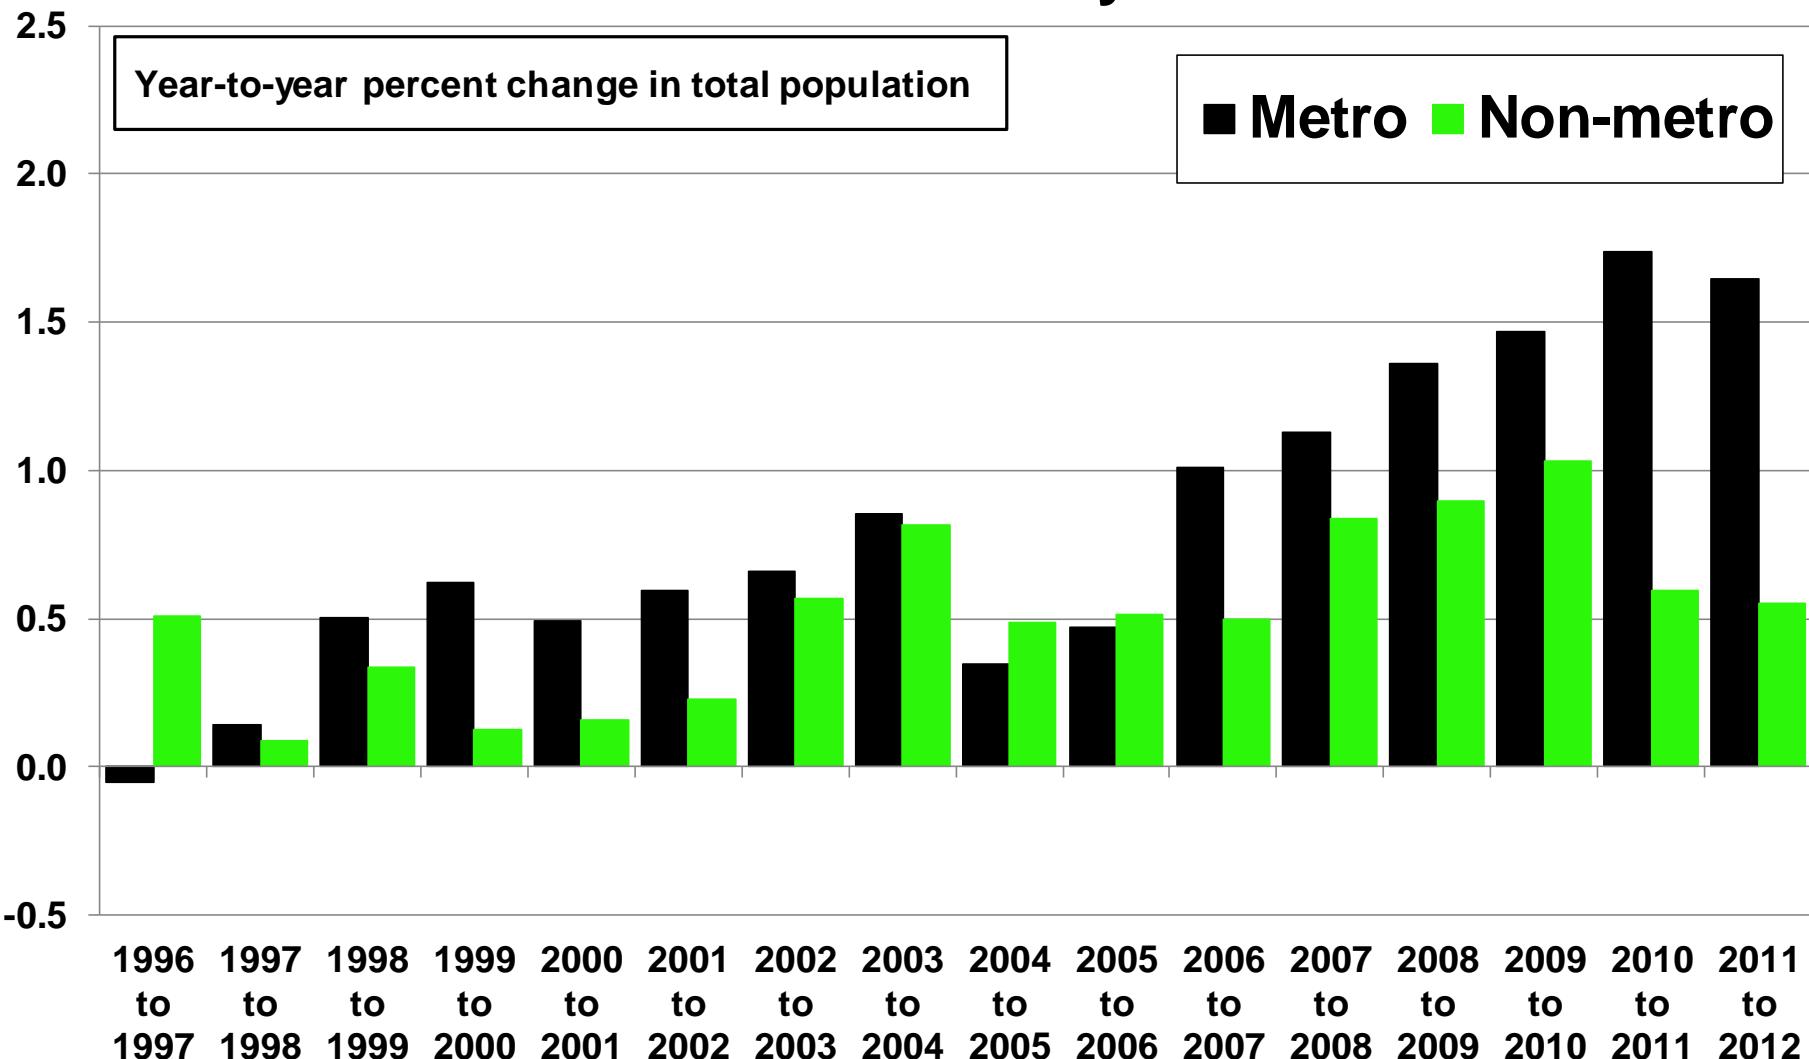

Source: Statistics Canada, Census of Population, 1991 to 2011.

Manitoba's Rural Demography

Outline

- **Rural development is getting harder - - - because there are now fewer potential labour market entrants than potential retirees**
- **Non-metro has had 40% of Manitoba's population since 1996**
- **Non-metro Manitoba is growing.**

Manitoba's non-metro population has grown continuously since 1996

* Reclassification is not an issue in this time series. These data have been tabulated within the 2006 boundaries of metro and non-metro.
Source: Statistics Canada. **Annual Demographic Statistics**. CANSIM Table 051-0001 and 051-0046.

Percent change in total population from 2011 to 2012

	Metro	Non-metro	Non-metro recent trends
Newfoundland and Labrador	1.5	-1.0	Decline since 1996
Prince Edward Island	n.a.	0.3	Growth since 2006
Nova Scotia	1.0	-0.7	Decline since 1996

Manitoba's Rural Demography

Outline

- Rural development is getting harder - - - because there are now fewer potential labour market entrants than potential retirees
- Non-metro has had 40% of Manitoba's population since 1996
- Non-metro Manitoba is growing.
- The sources of population change are:
 - Natural balance = births minus deaths
 - Internal migration (voting with your feed regarding where to live)
 - Immigration – some communities are attracting immigrants
 - Summary

Source: Statistics Canada. Annual Demographic Statistics. CANSIM Table 051-0052.

Manitoba's Rural Demography

Outline

- Rural development is getting harder - - - because there are now fewer potential labour market entrants than potential retirees
- Non-metro has had 40% of Manitoba's population since 1996
- Non-metro Manitoba is growing.
- The sources of population change are:
 - Natural balance = births minus deaths
 - Internal migration (voting with your feed regarding where to live)
 - Immigration – some communities are attracting immigrants
- Youth migration: How many leave? How many return?
- 17% of Manitoba's population reports an Aboriginal Identity

In 2011, 29% of Manitoba's population under 5 years of age had an Aboriginal Identity

Source: Statistics Canada. 2011 National Household Survey, Table no. 99-011-x2011026.htm

Aboriginal Identity population as a percent of the total population, Manitoba, 2011

	Total population	Population with an Aboriginal Identity	
		Number	As percent of total
All age groups	1,174,345	195,895	17
0 to 4 years	76,070	22,425	29
5 to 9 years	73,295	20,370	28
10 to 14 years	78,035	19,935	26
15 to 19 years	84,935	20,875	25
20 to 24 years	80,560	15,990	20
25 to 34 years	150,615	25,760	17
35 to 44 years	150,245	24,005	16
45 to 54 years	177,030	22,890	13
55 to 64 years	146,055	13,980	10
65 to 74 years	86,450	6,975	8
75 years and over	71,060	2,700	4

Manitoba's Rural Demography

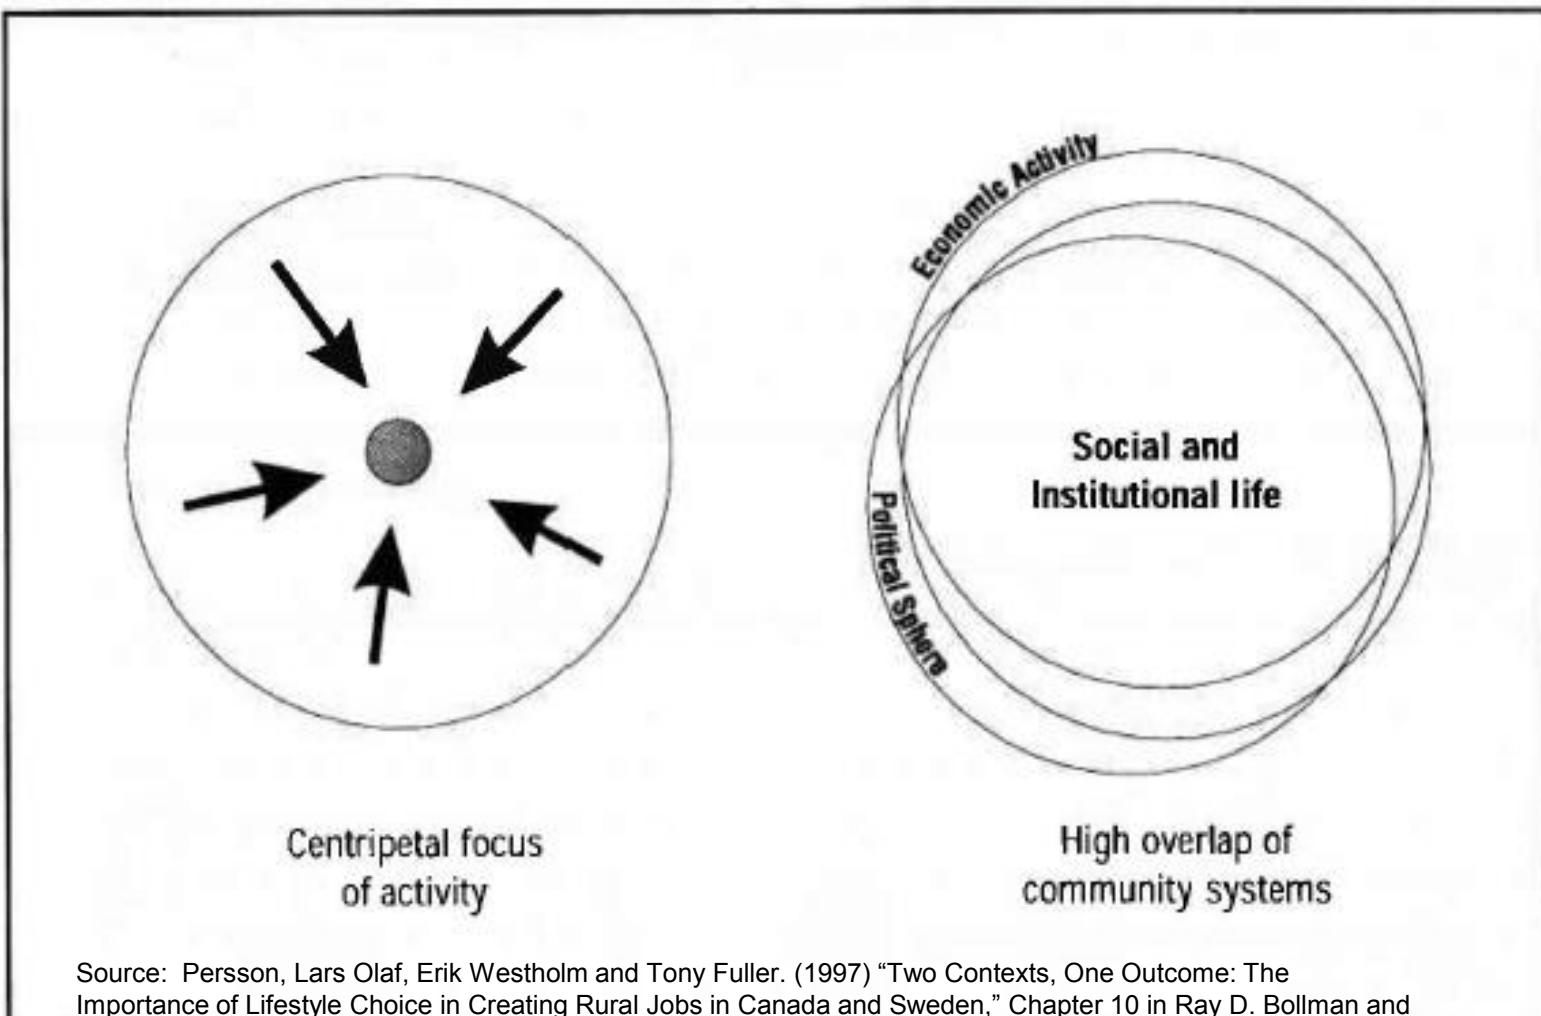

Outline

- Rural development is getting harder - - - because there are now fewer potential labour market entrants than potential retirees
- Non-metro has had 40% of Manitoba's population since 1996
- Non-metro Manitoba is growing.
- The sources of population change are:
 - Natural balance = births minus deaths
 - Internal migration (voting with your feet regarding where to live)
 - Immigration – some communities are attracting immigrants
- Youth migration: How many leave? How many return?
- 17% of Manitoba's population reports an Aboriginal Identity
- From a short-distance society to an industrial society to an arena society.

Recall the “short-distance” society:

- all activity focussed on the community;
- high overlap of community systems

Figure 10.2a. The short-distance society

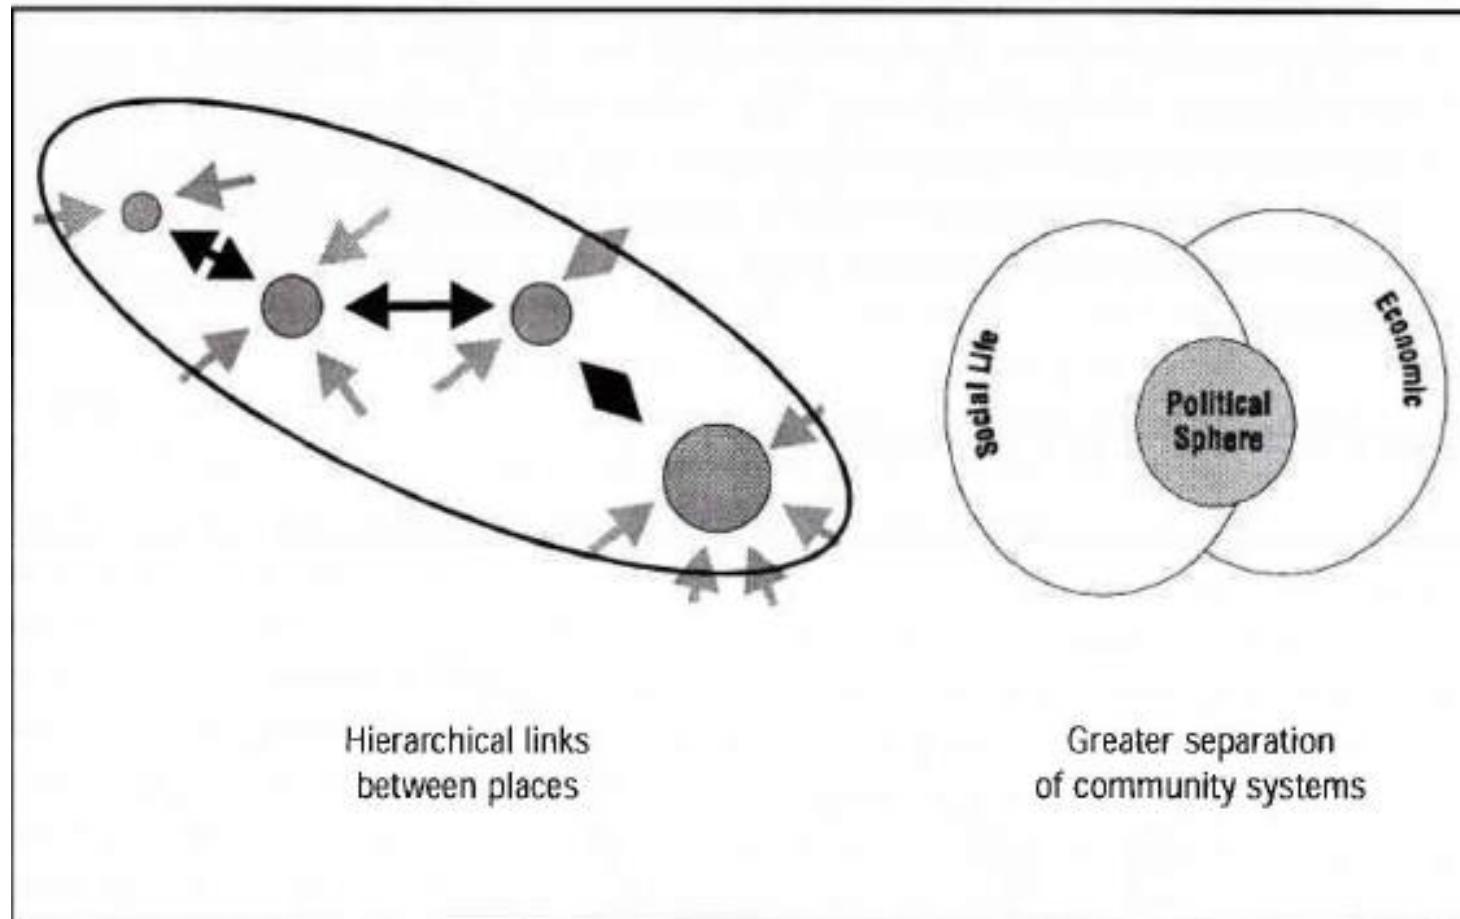

Source: Persson, Lars Olaf, Erik Westholm and Tony Fuller. (1997) "Two Contexts, One Outcome: The Importance of Lifestyle Choice in Creating Rural Jobs in Canada and Sweden," Chapter 10 in Ray D. Bollman and John M. Bryden (ed.) **Rural Employment: An International Perspective** (Brandon: Brandon University for the Canadian Rural Revitalization Foundation and Wallingford, U.K.: CAB International). Pp. 136 – 163.

Then, the industrial society:

- with hierarchical links between places because bigger places (e.g. regional service centres) took on more functions; and
- greater separation of community functions.

Figure 10.2b. The industrial society

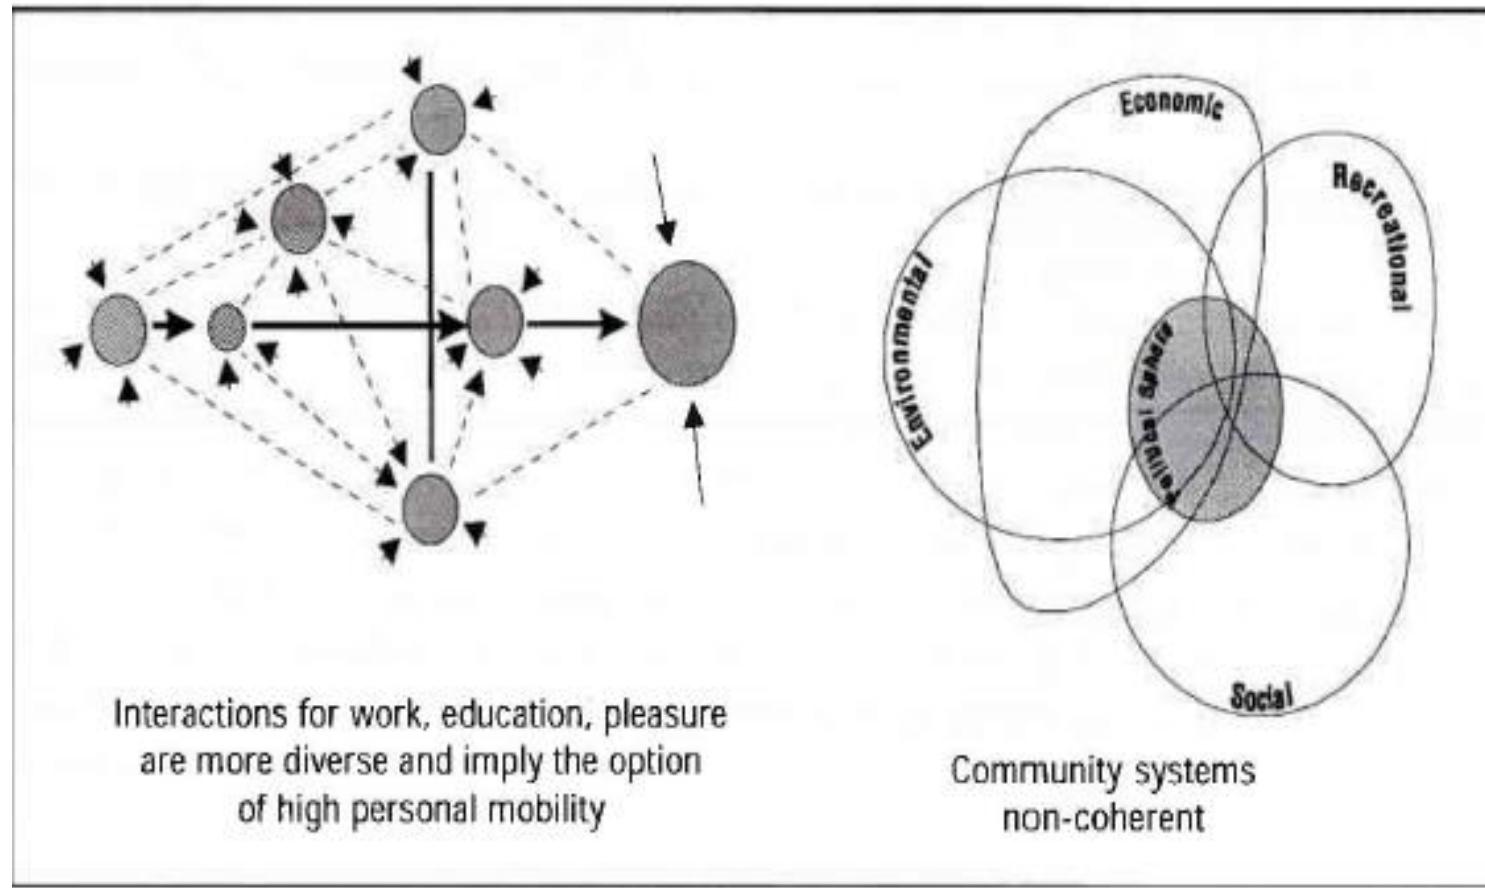

Source: Persson, Lars Olaf, Erik Westholm and Tony Fuller. (1997) "Two Contexts, One Outcome: The Importance of Lifestyle Choice in Creating Rural Jobs in Canada and Sweden," Chapter 10 in Ray D. Bollman and John M. Bryden (ed.) **Rural Employment: An International Perspective** (Brandon: Brandon University for the Canadian Rural Revitalization Foundation and Wallingford, U.K.: CAB International). Pp. 136 – 163.

Today, the open society:

- high personal mobility with different destinations for travel to work, education and pleasure;
- community systems overlap very little (become 'non-coherent').

Figure 10.2c. The open society

Source: Persson, Lars Olaf, Erik Westholm and Tony Fuller. (1997) "Two Contexts, One Outcome: The Importance of Lifestyle Choice in Creating Rural Jobs in Canada and Sweden," Chapter 10 in Ray D. Bollman and John M. Bryden (ed.) **Rural Employment: An International Perspective** (Brandon: Brandon University for the Canadian Rural Revitalization Foundation and Wallingford, U.K.: CAB International). Pp. 136 – 163.

- We have moved from a community-centric society to an “open” society where we all drive different directions for work, for education, for recreation and for entertainment.
- What are the implications of functional economic areas being larger than the “community”?

Some implications, to me,

- Less focus on community “economic” development (because of spillovers with neighbouring communities); and
- More focus on regional “economic” development
 - to quote “Red Green” – “We are all in this together, I’m pullin’ for yer.”
- Thus, a move from “rural community” development to “rural regional” development.
 - See, in particular, Partridge, Mark D. and M. Rose Olfert. (2011) “The Winners’ Choice: Sustainable Economic Strategies for Successful 21st-Century Regions.” **Applied Economic Perspectives and Policy** Vol. 33, No. 2 (Summer), pp. 143-178.
- Importantly, “rural regional” development differs from “metro regional” development, by definition of “rural”.
 - See Reimer, Bill and Ray D. Bollman. (2010) “Understanding Rural Canada: Implications for Rural Development Policy and Rural Planning Policy.” Chapter 1 in David J.A. Douglas (ed.) **Rural Planning and Development in Canada**. (Toronto: Nelson Education Ltd.)
- For various delineations of functional economic regions in Manitoba, see
 - Stabler, Jack and Richard C. Rounds. (1997) “Commuting and Rural Employment on the Canadian Prairies.” Chapter 13 in Ray D. Bollman and John M Bryden (ed.) **International Perspectives on Rural Employment** (Wallingford: CAB International and Brandon: Brandon University for the Canadian Rural Restructuring Foundation), pp. 193 – 204.
 - Munro, Anne, Alessandro Alasia and Ray D. Bollman. (2011) “Self-contained labour areas: A proposed delineation and classification by degree of rurality.” **Rural and Small Town Canada Analysis Bulletin** Vol. 8, No. 8 (Ottawa: Statistics Canada, Catalogue no. 21-006-XIE) (www.statcan.gc.ca/bsolc/olc-cel/olc-cel?catno=21-006-X&CHROPG=1&lang=eng).
