

Did you know...

An Informed Consent Guidance document has been developed by the Brandon University Research Ethics Committee (BUREC) to assist researchers when drafting the consent form for human-participatory research in accordance with consent requirements as outlined in the *Tri-Council Policy Statement: Ethical Conduct for Research Involving Humans (TCPS2-2018)*. This guidance document is not meant to dictate the exact language to use in the consent form for your project, but instead, aims to offer suggestions on language and to highlight the necessary consent elements that are to be included.

This new document can be found on the BUREC webpage at: www.brandonu.ca/burec under “Policies, Standard Operating Procedures, and Other Resources”.

If you have any questions or concerns, please contact BUREC at burec@brandonu.ca.
