Provided however, that where the previous employer so requires, as a condition for making such a transfer of contributions, the Member may be required, upon subsequent termination of employment, to have such contributions applied for the purchase of a vested annuity benefit. Transferred contributions which are subject to such restriction shall be referred to as restricted additional voluntary contributions.

3.4 Leave of Absence with Pay

A Member on leave of absence with pay shall be required to continue his contributions in accordance with Paragraph 3.1 based on the Basic Salary that he would have been receiving from the University were he not on such leave of absence.

3.5 Leave of Absence without Pay

A Member on leave of absence without pay may elect to suspend his contributions in accordance with Paragraph 2.7, or, provided he has at least 3 years' Service, continue to make contributions, for a maximum period of five years, based on the Basic Salary that he would have been receiving from the University were he not on such leave of absence, but in this situation, he must also make the contributions on behalf of the University in accordance with Paragraph 4.1. A Reciprocal Transfer Agreement is an agreement between this Plan and another registered pension plan in Canada under which an employee who ceases accruing benefits under one of the plans and commences accruing benefits under the other, may elect to have funds transferred from the original plan to the new plan and, as a consequence, shall have some or all of his or her pensionable service in the original plan count as pensionable service in the new plan.

Transfers to the Plan under a Reciprocal Transfer Agreement will be processed in accordance with the terms of that Agreement but in the event that such a transaction results in a Past Service Pension Adjustment (PSPA) which must be certified in accordance with the Income Tax Regulations, the University shall delay completion of the transfer until the PSPA has been so certified.

3.8 Past Service Contributions

A Member who transferred into the Plan under a Reciprocal Transfer Agreement and whose pensionable service in the previous employer's plan did not all count as Credited Service in the Plan, may make additional contributions to the Plan, subject to the annual amount of any such contributions not exceeding the maximum allowed by the Income Tax Act from time to time, so that some, or all, as determined by the Actuary, of the non-utilised service under the previous employer's plan will count as Credited Service in the Plan.

A Member, whose employment with the University has not ceased by reason of retirement or termination of employment, and who has employment service with the University prior to joining the Plan may elect to make additional contributions to the Plan, subject to the annual amount of any such contributions not exceeding the maximum allowed by the Income Tax Act, with respect to such pre-membership service. In that event, some, or all, as determined by the Actuary, of the pre-membership service will count as Credited Service under the Plan. If a Member elects to make additional contributions to the Plan in respect of such pre-membership service with the University:

- (a) the Member shall make all contributions to the Fund with respect to those periods,
- (b) the University is not required to make any contributions with respect to those periods.

Whether the Member purchases service or not, the Member will be responsible for any actuarial costs to provide the quotation of the amount of contribution required to purchase the service.

Where such a period of service is prior to 1990, the benefit which can be provided is limited to that provided by Income Tax Regulation 8504(6).

3.9 Suspension of Member Contributions after Normal Pension Commencement

A Member who is an Employee after their Normal Pension Commencement Date may elect to cease contributing to the Plan at the end of any pay period on or after their Normal Pension Commencement Date.  - (iii) If the Member has completed 15 years of Qualifying Service and is less than age 60, the early commencement pension shall be calculated in accordance with Paragraph 7.1 but reduced by the sum of 10% and 1/2% for each month by which his actual pension commencement date precedes the first of the month following his 60th birthday.
- (c) For a Member whose pension commences on or after April 1, 1996, the following provisions shall apply:
 - (i) If the Member's age plus Qualifying Service equals at least 85 and the Member is at least age 60, the early commencement pension shall be calculated in accordance with Paragraph 7.1.
 - (ii) If the Member has not satisfied the conditions in Paragraph 6.2(c)(i) above, the early commencement pension shall be calculated in accordance with Paragraph 7.1 but reduced by 1/3% for each month by which the actual commencement date precedes the date on which the Member would first have satisfied the provisions in Paragraph 6.2(c)(i) had employment with the University continued.

6.3 Late Pension Commencement Date

A Member who continues in employment after his Normal Pension Commencement Date shall defer receipt of the pension until actual retirement date or the end of the calendar year in which the Member attains age 71, if earlier. The pension shall be calculated in accordance with Paragraph 7.6. If the Member has not made an election under Paragraph 3.9 to stop contributing, the Member shall continue making contributions to the Plan.

ARTICLE 7 - CALCULATION OF PENSION

7.1 Basic Pension

Subject to 7.4, the annual pension payable to a Member who retires on or after his Normal Pension Commencement date shall be equal to

- (a) if he or she retires on or after January 1, 1999,
 - (i) 2% of Final Average Earnings multiplied by years of Credited Service, LESS
 - (ii) 0.6% of Canadian Pension Plan Average Earnings multiplied by years of Credited Service since January 1, 1990, or
- (b) if he or she retired prior to January 1, 1999,
 - (i) 2% of Final Average Earnings multiplied by years of Credited Service, LESS
 - (ii) 0.6% of Canadian Pension Plan Average Earnings multiplied by years of Credited Service since January 1, 1966.

The pension payments for a Member who retired prior to January 1, 1999 shall be increased effective on that date so that the pension after the increase will be equal to that which it would have been at the date of retirement had paragraph (a) applied at that date, increased by all supplementary increases made since the date of retirement.

For the purpose of this Paragraph 7.1

"Final Average Earnings" means the annual average of the Member's Basic Salary in the 60 months of Service when such Basic Salary was highest during the 12 years prior to the date of death, retirement or termination of employment.

"Canada Pension Plan Average Earnings" means the annual average of that part of the Member's Basic Salary in the same 60 months as were used to calculate "Final Average Earnings" which is less than the Year's Maximum Pensionable Earnings during those months.

Where a member has made an election to stop contributing under Paragraph 3.9 and the contribution stop date is a date other than a calendar year-end, the Final Average Earnings and Canada Pension Plan Average Earnings would be calculated using prorated earnings and service for the last calendar year in which contributions were made.

7.2 Minimum Pension for Service after January 1, 1985 (50% Rule)

As required under the Pension Benefits Act, if the Post-1984 Required Contribution Account is greater than 50% of the Commuted Value of the Basic Pension in respect of Credited Service after January 1, 1985 and for periods where contributions were made, the Member may, on retirement, elect to:

- (i) receive a refund of the excess, or
- (ii) apply the excess to increase the Basic Pension.

7.3 **Supplementary Pension**

- (a) If, in 1990 or any subsequent calendar year prior to 2012, the net investment return on the Fund, as determined by the Actuary using smoothed asset values, exceeds 6.0% per annum, each Pensioner who was receiving a pension at the end of that year, including a Pensioner whose pension has been purchased from an Insurer, shall be entitled to receive an increase in such pension effective from July 1 in the following calendar year.

If, in 2012 or any subsequent calendar year, the average net investment return on the Fund, or if a portion of the Fund is allocated to support Pensioner liabilities the average net investment return on that portion of the Fund, exceeds 6.0% per annum, each Pensioner who was receiving a pension at the end of that year, including a Pensioner whose pension has been purchased from an Insurer prior to 1990, shall be entitled to receive an increase in such pension effective from July 1 in the following calendar year. The average net investment return on the Fund or allocated portion of the Fund, as the case may be, for this purpose shall be calculated by the Actuary based on the geometric average of the net investment return for the current year and the corresponding net investment return for a number of preceding years, where the number of preceding years is determined in accordance with administrative policy as adopted by the Pension Trustees from time to time.”

- (b) For a Pensioner who was receiving a pension at the start of the calendar year, the increase shall consist of a percentage increase in the pension, which percentage shall be equal to the lesser of
 - (i) the excess of the average net investment return over 6.0% (the "excess interest" increase), and
 - (ii) the increase in the Consumer Price Index (Canada) over the 12 month period ending in December of the calendar year (the "CPI" increase).
- (c) For a Pensioner who commenced receiving the pension during the calendar year, the increase shall be the same proportion of the increase determined in accordance with (b) above, as the number of months during which the Pensioner received the pension

in the calendar year bears to 12.

- (d) For the purpose of this Section 7.3, a “Pensioner” includes a Member who commenced a pension in accordance with Section 6 and a surviving Eligible Spouse of a Member who commenced a pension in accordance with Section 6 on a survivor pension basis.
- (e) If, in a calendar year, the "excess interest" increase is less than the "CPI" increase, but in a subsequent calendar year, the "excess interest" increase is greater than, and hence limited by, the "CPI" increase, the University may, on the recommendation of the Pension Trustees, provide that the unused excess interest in that subsequent year be used to enhance the increase for that year for those who were affected by the limitation in a previous year in order to make up part or all of the shortfall in that previous year.

7.4 **Maximum Pension**

The maximum annual pension at retirement, termination of employment or termination of the Plan, including any retirement income payable under any other registered pension plan of the University but excluding the portion of the annual retirement income derived from the Member's Additional Voluntary Contribution Account shall not exceed the lesser of:

- (i) the Defined Benefit Limit times the number of years of Credited Service, or
- (ii) an amount that is the product of 2% per year of Credited Service and the average of the best three non-overlapping 12 month periods of Basic Salary paid to the Member by the University.

In the above calculation, Credited Service prior to December 31, 1991 shall be limited to 35 years. For the purpose of this Paragraph 7.4, “Defined Benefit Limit” shall mean \$1,722.22 for Members whose employment terminates at any time prior to April 1, 2009 and \$1,975.00 for Members whose employment terminates at any time after March 31, 2009.

7.5 **Suspension of Pension on Re-employment**

Where a Member elects to suspend pension payments in accordance with Paragraph 2.8, on the re-commencement of the pension, the Member will receive two separate pensions in accordance with paragraphs (a) and (b)

- (a) the recalculated pension applicable to the period of employment that preceded the initial pension commencement date (the “Initial Employment Period”), shall be calculated as follows:
 - (i) If the retired Member’s initial pension commencement date occurred before the Normal Pension Commencement Date and before meeting the criteria for an unreduced early retirement pension provided by Paragraph 6.2, the amount of pension to which the retired Member would have been entitled, under the terms of

the Plan as it read on the initial pension commencement date, had the retired member retired

- A. At the Assumed Age and
- B. After having worked the Initial Employment Period

The Assumed Age for the purpose of this paragraph (a)(i) is the age of the retired member at the subsequent pension commencement date less the period of time the member was in receipt of a pension determined based on a prior period of plan membership following the initial pension commencement (“Subsequent Employment Period”);

- (ii) If the retired member’s initial pension commencement date occurred before the Normal Pension Commencement Date and at or after meeting the criteria for an unreduced early retirement pension provided by Paragraph 6.2, the amount of pension that was payable at the initial pension commencement date;
 - (iii) If the retired member’s initial pension commencement date occurred at or after the Normal Pension Commencement Date, the amount of pension that was payable at the initial pension commencement date;
 - (iv) If the date of re-commencement of the pension is after the Normal Pension Commencement Date, the pensions under (a)(i) and (a)(ii) are increased to be the actuarial equivalent of the pension as if it would have been payable at the Normal Pension Commencement Date, and the pension under (a)(iii) is increased to be the actuarial equivalent of the pension as if it would have been payable at the date the pension was suspended. For greater clarity, an actuarial increase is applied to any period during which the pension is suspended after the Normal Pension Commencement Date.
 - (v) Any remaining guarantee period at the time of re-employment is paused during the Subsequent Employment Period so that the total number of guaranteed payments is preserved.
- (b) the pension for the Subsequent Employment Period is determined according to the plan terms for the period of employment without regard to the Initial Employment Period.

7.6 Pension Amount at Late Pension Commencement Date

The pension for a Member who retires at his Late Pension Commencement Date shall be calculated in accordance with Paragraph 7.1, including earnings and service after his Normal Pension Commencement Date up to the earlier of the Late Pension Commencement Date and the effective date of an election to stop contributing under Paragraph 3.9.

Notwithstanding the above, if a Member retires from active employment after May 31, 2010, on his Late Pension Commencement Date, the pension is the greater of:

- (a) The pension calculated in accordance with Paragraph 7.1 at the Member's actual pension commencement date, including earnings and service after his Normal Pension Commencement Date up to the earlier of the Late Pension Commencement Date and the effective date of an election to stop contributing under Paragraph 3.9;
- (b) The actuarial equivalent of the pension calculated in accordance with Paragraph 7.1 that would have been payable if the Member had retired at his Normal Pension Commencement Date; and
- (c) The actuarial equivalent of the pension calculated in accordance with Paragraph 7.1 that would have been payable if the Member had retired on the effective date of their election to stop contributing under Paragraph 3.9.

ARTICLE 8 - FORM OF PENSION

8.1 Normal Form

The pension shall be payable commencing on the first day of the month coincident with or next following the Member's retirement date and continuing on the first day of each month thereafter during the lifetime of the Member.
